- General hygiene considerations** : Handle the filament respecting good industrial hygiene and safety practices.

### 7.2 CONDITIONS FOR SAFE STORAGE, INCLUDING ANY INCOMPATIBILITIES

- Requirements with respect to the warehouse and the containers** : Store in a dry place, protect from sunlight, store between 10°C and 40°C.
- Standards in case of joint storage** : It is not necessary.
- Additional information on storage conditions** : Store in tightly closed containers in a cool, dry place.

## SECTION 8. EXPOSURE CONTROLS AND PERSONAL PROTECTION

### 8.1 CONTROL PARAMETERS

*This material can generate particles not classified according to other criteria (PNOC). The US Occupational Safety and Health Administration (OSHA) imposes a PEL / TWA (Permissible exposure level / time-weighted average) value for PNOC of 15 mg / m<sup>3</sup> for total dust and 5 mg / m<sup>3</sup> for respirable fraction.*

The American Conference of Governmental Industrial Hygienists (ACGIH) imposes a TLV / TWA (Product Concentration Limits / Time-weighted Average) for PNOC of 10 mg / m<sup>3</sup> for inhalable particles and 3 mg / m<sup>3</sup> for respirable particles.

Where reasonably practicable, this should be done using local ventilation and good general extraction. It must have adequate extraction in those places where dust is formed.

## 8.2 EXPOSURE CONTROLS

<b>Eye protection</b>	: None during normal handling and use. Protective goggles with side cover to protect against the molten filament.
<b>Skin and body protection</b>	: None during normal handling and use. Wear appropriate work clothes. Wear gloves to protect against burns when using molten material.
<b>Inhalation</b>	: Keep air concentrations below recommended exposure limits (where applicable), otherwise an approved respirator should be worn.
<b>Hygiene measures</b>	: Handle the filament respecting good industrial hygiene and safety practices.
<b>Engineering controls</b>	: Provide local exhaust ventilation systems. The ventilation must be enough to effectively eliminate and prevent the accumulation of dust or fumes that may be generated during and during the handling or thermal processing of the filament.
