

# Pro2 Air Filter Installation instruction

## STEP 1: Loose the Back Cover

Remove the screws marked in red in the following images.  
Keep the screws in green.

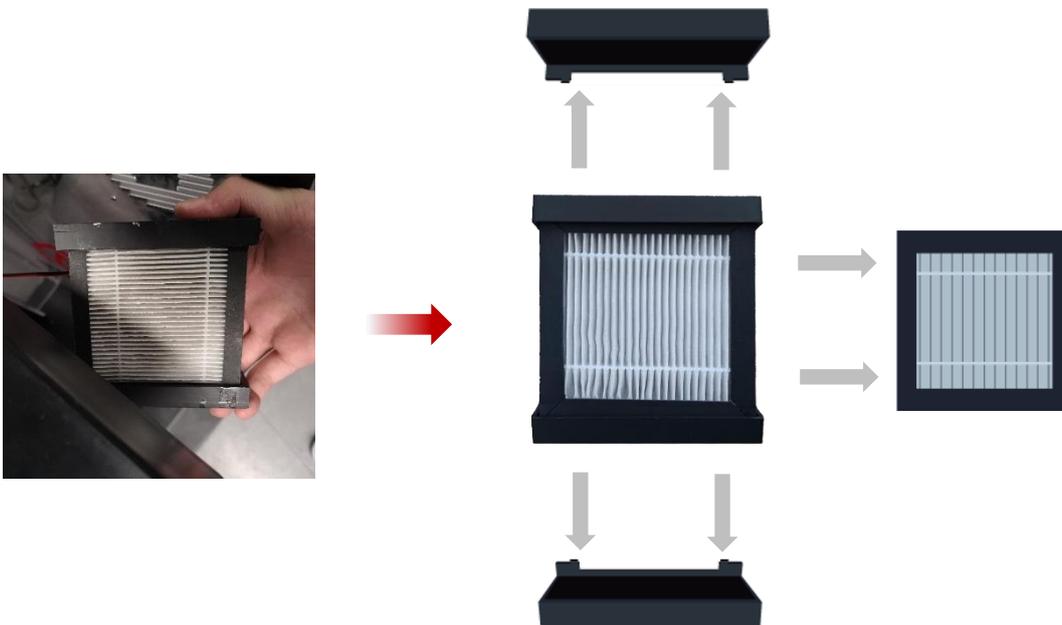

## STEP 2: Remove the Fixing Screws of the Filter System

Hold the filter system with one hand and remove the 4 fixing screws marked in red from the back cover with the other hand.

### STEP 3: Take the System Apart

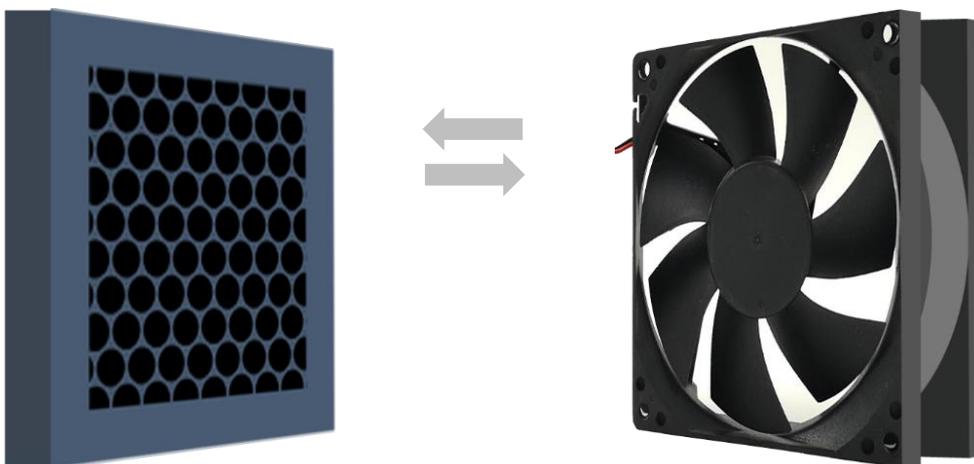

Separate the filter system into 4 parts: fan, filter cartridge and 2 brackets.

### STEP 4: Replace the Filter Cartridge

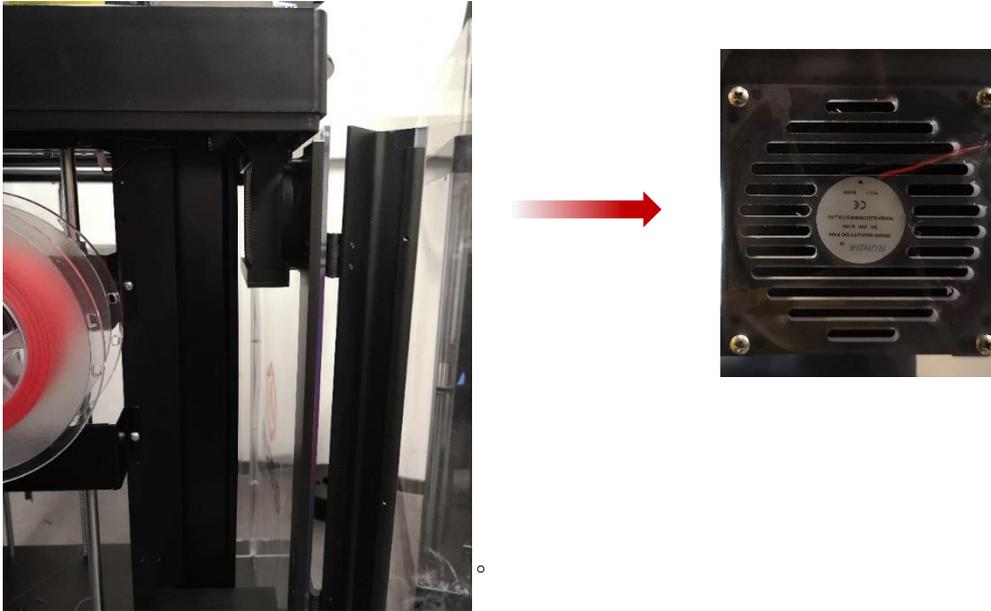

Take the origin filter cartridge out and install the new filter cartridge.

Face the black honeycomb side of the cartridge to the no label side of the fan. Install the 2 brackets to fix the filter cartridge and the fan.

### STEP 5: Install the Filter System

Hold the filter system with one hand and install the 4 fixing screws with the other hand. Face the tiny arrow on label of the fan upward. Watch out the fan cable.

### STEP 6: Fix the Back Cover

Install the fixing screws of the back cover.
