

Soft PLA 3D Filament 1.75 mm, 750 g, Black

Product no.: 7187103

One spool with plastic filament out of elastic Soft-PLA in black. This wire is also suitable for 3D Printer and Rapid Prototyper. The transport should get along with soft materials. There is practically no shrinkage (almost no warp effect). This PLA is a soft material that is more bendable than HD-PE or PP. Its surface feel is like rubber or tpe. This Soft Poly Lactic Acid is very flexible like rubber, but harder than TPE. The hardness is around Shore 95 A.

Nominal diameter	1.75 mm
Material	soft and bendable Soft Premium Polylactic Acid / Polylactide
Colour	black
Length	> 250 meter
Weight	approx. 750 g (without blank spool)
Dimension (reel)	outer Ø ~ 200 mm, width ~ 55 mm

No danger to your health: This filament does not contain any hazardous chemical substances. The material is harmless in contact with the human skin and in contact with food. The material meets the requirement of the European Union Food Contact Regulation (EU) and the US Food and Drug Administration (FDA). This filament is RoHS certified and REACH compliant.
