# **SECTION 4 - FIRST AID MEASURES**

**IF SWALLOWED:** Ingestion is an unlikely route of exposure. Wash out your mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. If unconscious, place in the recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt, or waistband. Call a poison control center or doctor immediately for treatment advice. Do not induce vomiting unless told to do so by the poison control center or consult a doctor if necessary. Seek immediate medical attention.

**IF ON SKIN OR CLOTHING:** Immediately flush with plenty of water for at least 15 minutes. Remove contaminated clothing. Wash skin using soap. Get medical attention if symptoms persist. Cool skin rapidly with cold water after contact with hot polymer. DO NOT attempt to remove hot polymer from skin or contaminated clothing as skin may be easily damaged. If skin irritation persists, call a physician.

**IF IN EYES:** Flush eyes with large volumes of water for at least 15 minutes lifting upper and lower eyelids occasionally. Seek medical attention if irritation develops.

**IF INHALED:** Remove to fresh air. Lay patient down. Cover with a blanket. If symptoms persist, call a physician. If a person is not breathing, call 911 or an ambulance, then provide medical aid.

**MAIN SYMPTOMS:** Redness, coughing and/or wheezing.

NOTE TO PHYSICIAN: Treat symptomatically.

## **SECTION 5 - FIRE FIGHTING MEASURES**

FLAMMABILITY

AUTOIGNITION TEMPERATURE: 388°C

SUITABLE EXTINGUISHING MEDIA: Use foam, Carbon Dioxide (CO2), dry chemical, alcohol

resistant foams (preferred if available). General-purpose synthetic foams (including ADDD) or protein foams may function, but much less effectively.

**UNSUITABLE EXTINGUISHING MEDIA:** Do not use a solid water stream as it may scatter and spread fire.

**SPECIFIC HAZARDS ARISING FROM THE CHEMICAL:** Thermal decomposition can lead to release of irritating gasses, vapors, and metal oxide/oxides. Do not breathe fumes in case of fire.

HAZARDOUS COMBUSTION PRODUCTS: Carbon oxides Nitrogen oxides (NOx) Hydrocarbons.

### **EXPLOSION DATA**

SENSITIVITY TO MECHANICAL IMPACT: Not sensitive.

**SENSITIVITY TO STATIC DISCHARGE:** Fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

**FIRE FIGHTING INSTRUCTIONS AND FIRE FIGHTING EQUIPMENT:** Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full lace-piece operated in positive pressure mode (MSHA/NIOSH approved or equivalent) and full protective gear. Cool containers / tanks with water spray. Water mist may be used to cool closed containers.

ADDITIONAL INFORMATION: No information available.

**PERSONAL PROTECTIVE EQUIPMENT:** Wear self-contained breathing apparatus.

## SECTION 6 - ACCIDENTAL RELEASE MEASURES

**PERSONAL PRECAUTIONS:** Ensure adequate ventilation. Standard personal protection equipment (PPE). Avoid contact with skin and eyes. Avoid dust formation.

**ENVIRONMENTAL PRECAUTIONS:** Avoid dispersal of spilled material, runoff and contact with soil, waterways, drains, and sewers. Should not be released into the environment, may be dangerous to birds and small animals. Inform the relevant authorities if the product has caused environmental pollution (sewers. waterways. soil or air).

**METHODS FOR CLEANING UP:** Vacuum or carefully scoop up spilled material and place in an appropriate container for disposal. Avoid creating dusty conditions and prevent wind dispersal. Ventilate the area through non-mechanical means (e.g. opening a window). Take care not to raise dust. Use non-sparking tools. Clean up using methods which avoid dust generation such as vacuuming (with appropriate filter to prevent airborne dust levels which exceed the TLV), wet dust mop or wet clean up. If airborne dust is generated, use an appropriate NIOSH-approved respirator.

## **SECTION 7 - HANDLING AND STORAGE**

**HANDLING:** Put on appropriate personal protective equipment (see Section 8). Avoid exposure - obtain special instructions before use. Do not handle it until all safety precautions have been read and understood. Do not get in eyes or on skin or clothing. Do not ingest.

Avoid breathing dust. If during normal use the material presents a respiratory hazard. use only with adequate ventilation or wear appropriate respirator.

**STORAGE:** Use personal protective equipment. Workers should be protected from the possibility of contact with molten material during fabrication. Avoid contact with eyes. Low hazard for usual industrial or commercial handling. Avoid dust formation. Wash hands before eating. Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash their hands and face before eating. drinking and smoking Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

# SECTION 8 - EXPOSURE CONTROLS, PERSONAL PROTECTION

TLV: Threshold Limit Value over 8 hours of work.

PEL: Permissible Exposure Limit

**ADDITIONAL PROTECTION:** Provide eyewash station and washing facilities accessible to areas of use and handling.

## ENGINEERING CONTROLS

**Engineering Measures:** Apply technical measures to comply with the occupational exposure limits. Where reasonably practicable this should be achieved by the use of local exhaust ventilation and good

general extraction. Provide appropriate exhaust ventilation at places where dust is formed. Provide sufficient mechanical ventilation to reduce airborne concentrations and minimize exposure. Maintain employee exposure below applicable permissible exposure limits.

## **EXPOSURE MONITORING**

Exposure Limits: See table above.

Hygiene Measures: Avoid contact with eyes.

### PERSONAL PROTECTIVE EQUIPMENT

**Eye protection:** Avoid eye contact. To minimize the risk of injury to eyes, always wear appropriate protective safety glasses, side-shields or chemical safety goggles.

**Skin protection:** Avoid skin contact with molten polymer. Wear appropriate protective clothing to minimize risk of injury to the skin from contact with dust or physical abrasion. Long sleeved/impervious clothing if contact is probable and skin is sensitive. Protect contact with skin when processing; while material is hot, wear insulated safety gloves; wash hands after handling. Coveralls should be made from fire resistive materials which tend to not accumulate static charges. They should be designed in such a way as to avoid accumulation of dust in cuffs, pockets, etc.

**Respiratory protection:** Respirator must be worn if exposed to dust. Wear a respirator with a dust filter.

Respiratory protection is needed if any of the exposure limits in Section 3 are exceeded. Consult an industrial hygiene professional prior to respirator selection and use. Use a positive-pressure air supplied respirator if there is any potential for an uncontrolled release, exposure levels are not known, or any other circumstances where air-purifying respirators may not provide adequate protection. WARNING: Air purifying respirators do not protect workers in oxygen-deficient atmospheres.

Hand protection: While material is hot, wear insulated safety gloves; wash hands after handling.

**Hygiene measures:** Provide regular cleaning of equipment, work area and clothing. Handle in accordance with good industrial hygiene and safety practices. Do not eat, drink or smoke when using this product. Wash hands before breaks and immediately after handling the product. Avoid contact with eyes. Do not breathe dust. Use personal protective equipment as required.

**Special hazard:** Workers should be protected from the possibility of contact with molten material during fabrication.

Environmental Protection: Do not allow to enter drains or watercourses.
