

Zero Basic Entry Level-Desktop Robotic Arm

The new series of myPalletizer elephant palletizing robot arm, which is jointly produced with M5STACK, is a fully packaged lightweight four-axis palletizing robot arm. The overall finless design is compact and easy to carry.

myPalletizer body weight 960g, load 250g, working radius 260mm; specially designed for makers and education, easy to use, rich expansion interfaces, unlimited development possibilities; a variety of AI suit options, machine vision, composite robots, etc., learn about the cutting-edge technology of learning robots Knowledge inspires innovative thinking.

The fin design, the appearance is fully wrapped

The optimal space-removing fin design concept that can be loaded into a backpack subverts the traditional link-type educational four-axis robotic arm.

LED dual display

The robotic arm carries two display screens, which is easy to expand the interactive output of the application, and the gameplay is unlimited.

LEGO ecology, compatible with all my series accessories

The patented Lego hole design is shared globally, and the my series hardware ecological platform concept is implemented, and the end accessories are plug and-play.

Zero foundation, easy to get started

It is easy to get started and use, and the graphical programming language allows you to easily start the journey of using the robotic arm.

Support ROS ecology

It is developed using the global mainstream robot communication framework ROS, and supports simulation, control and algorithm verification in a virtual environment, which reduces the requirements for the experimental environment
