

## TOOL CARTRIDGE

WWW.VORONDESIGN.COM

### AVAILABLE MOUNTS

We also provide mounts for the Slice Engineering Mosquito and TriangleLab/Phaetus Dragon Hotend.

They are assembled in a similar manner.

## TOOL CARTRIDGE

Stepper Motor

BMG Drive Pinion

M3x8 SHCS

**STEPPER WIRES**

If the steppers has wires cut them to approximately 150mm.  
Wires/connector to the right hand side.

**LUBRICATE BEARINGS**

A light lubrication film will help with smooth operation and longevity.

BMG Drive Assembly

**CHECK BEARING FIT**

The bearings must slip on and off the shaft easily. Pressing the bearings on the shaft will damage them. Lightly sand the shaft if required.

## CLOCKWORK

M3x20 SHCS

## REMOVE TOP COVER

Split the fan open by bending the tabs on the side.

## DON'T OVER TIGHTEN

The screws are screwd directly into plastic.

Piece of Filament

## FAN ASSEMBLY

## Y ENDSTOP

WWW.VORONDESIGN.COM

### SOLDER WIRES

Solder 500mm of wire to the microswitch before inserting it flush into the housing.

Microswitch

M3x16 SHCS

M5x16 BHCS

### PRELOADED NUTS

The nuts have been installed several chapters before.

GT2 Pulley

## REMOVE FLANGE & GRUB SCREWS

Use a bottle opener or some pliers to remove the top flange.

Remove the grub screws from the pulley.

## PRESS FIT

Apply the required force to fully seat the pulley in the printed part.

M2x10 Self Tapping

## SOLDER WIRES

Solder 100mm of wire to the microswitch before inserting it into the housing.

Microswitch

## Z ENDSTOP

WWW.VORONDESIGN.COM

M3x20 SHCS

## CABLE CHAIN

WWW.VORONDESIGN.COM

### FIXED END VS. FREE END

Some cable chains only have one end that is able to swing freely. Use this end on the back of the Afterburner.

## CABLE CHAIN

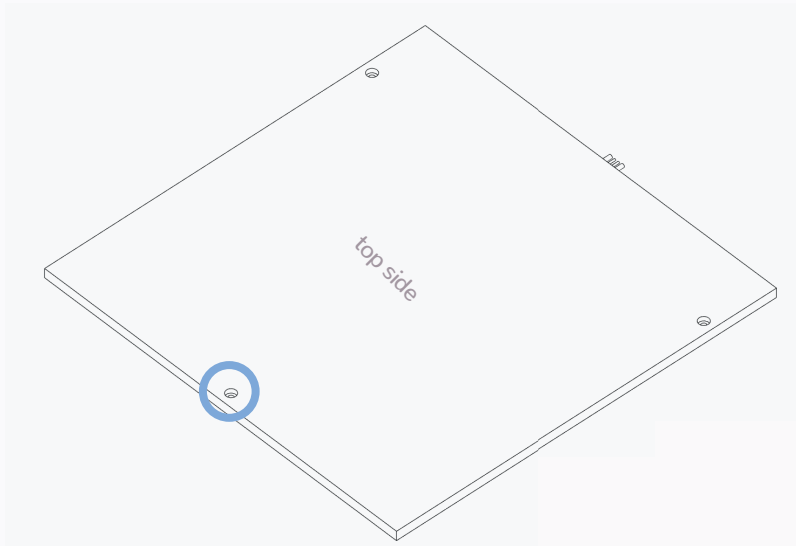

WWW.VORONDESIGN.COM

### FIXED END VS. FREE END

If you cable chain as a fixed and use this end on the XY joint.

## PRINT SURFACE

The print surface can be applied directly to the print bed or alternatively a magnet based removable system can be used.

A removable surface is recommended. Preinstalling the screws is possible but not recommended as those will interfere with the heater application.

Read/watch a guide about the proper application if you are unsure.

## PRINT BED

WWW.VORONDESIGN.COM

### HEATER APPLICATION

Attach the heater to the bottom of the plate with wires facing away from the center hole.

Read/watch a guide on heater installation if you are unsure about the procedure.

# SCREW ACCESS HOLES

Cut holes for the screws.

M3 Shim

M3 Thumb Nut

M3x16 SHCS

# REPEAT FOR SECOND MOUNT

## DECK PANEL

WWW.VORONDESIGN.COM

**CUTOUT TOWARDS THE BACK**

The wires will be routed through the cutouts.  
Make sure they are pointing towards the  
back of the printer.

This page intentionally left blank.

SSR Din Mount

M4x6 BHCS

M3x8 SHCS

**SPRING LOADED**

Use a flat head screw driver to pull the latch open. It will lock open.

Be careful when releasing the latch, it will snap back into place. Mind your fingers.

**APPLY VHB TAPE**

3M VHB tape is a double sided adhesive tape. Other vendors have similar products that you can use as a substitute.

This page intentionally left blank.

Heat Set Insert

**BSPP ADAPTER**

Some adapters have a small lip that prevents the PTFE tube from passing through.

Inspect the adapter and if necessary use a drill to carefully remove the lip.

## EXHAUST

### MECHANICAL ASSEMBLY COMPLETED ... NEXT STEP WIRING & ELECTRICAL

This manual is designed to be a simple reference manual for the build process. Wiring and the initial setup of your printer is not included.

For details on wiring, setup of the electronics and other initial steps of your new printer please visit our documentation available on github.

<https://github.com/vorondesign/voron-1>

### HOW TO GET HELP

If you need assistance with your build, we're here to help. Head on over to our Discord group and post your questions. This is our primary medium to help VORON Users and we have a great community that can help you out if you get stuck.
