Use water spray, alcohol-resistant foam, dry chemical or carbon dioxide.

#### Unsuitable extinguishing media

High volume water jet media

### 5.2 Special hazards arising from the substance or mixture

#### During firefighting

Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard.

Do not use a solid water stream as it may scatter and spread fire.

Build-up of dangerous/toxic fumes possible in cases of fire/high temperature.

#### Hazardous combustion products

Carbon monoxide, carbon dioxide and unburned hydrocarbons (smoke).

Nitrogen oxides (NO<sub>x</sub>)

Ammonia

Hydrogen cyanide (hydrocyanic acid)

Sulphur compounds

Metal oxides

### 5.3 Advice for fire-fighters

Exposure to decomposition products may be a hazard to health. In the event of fire, wear self-contained breathing apparatus.

## SECTION 8: Exposure controls/personal protection

### 8.1 Control parameters

Contains no substances with occupational exposure limits.

### 8.2 Exposure controls

#### Appropriate engineering controls

Provide sufficient air exchange and/or exhaust in work rooms.

Handle product only in closed system or provide appropriate exhaust ventilation at machinery.

Apply measures to prevent dust explosions.

#### Personal protective equipment

##### Eye protection

Safety glasses with side-shields

##### Skin protection

##### Hand protection

Suitable gloves type

##### Remark

The suitability for a specific workplace should be discussed with the producers of the protective gloves.

The choice of an appropriate glove does not only depend on its material but also on other quality features and is different from one producer to the other.

As the product is a mixture of several substances, the durability of the glove materials cannot be calculated in advance and must be tested before use.

The exact break through time can be obtained from the protective glove producer and this must be observed.

The breakthrough time depends amongst other things on the material, the thickness and the type of glove and therefore must be measured for each case.

Request information on glove permeation properties from the glove supplier.

Choose gloves to protect hands against chemicals depending on the concentration and quantity of the hazardous sub-stance and specific to place of work.

##### Body protection

Safety shoes

Wear suitable protective clothing.

Follow the skin protection plan.

##### Respiratory protection

Effective dust mask

In the case of vapour formation use a respirator with an approved filter.
